

Custom e-Learning Content Creation Solutions by 360training

360training has developed over 3000 clock hours of interactive multimedia courseware for a broad range of industries. Leveraging a vast library of learning objects, in-house audio, video and multimedia production technology and resources, we provide end-to-end e-Learning content creation solution for our clients. All customized e-Learning is structured in an affordable, fee-for-service or pay-per-use model that provides media rich, compelling learning presentations optimized for low bandwidth delivery.
