

## Configurable Code of Conduct™ for Ethics

360training.com's **Configurable Code of Conduct™** enables a refreshable, customizable, and low-cost option that engages your employees in your companies' code of conduct policies by combining industry best practices that make sense in today's business climate.

While most compliance providers create a fully custom code of conduct that can be expensive, time consuming, and involves significant investment for SME and other internal resources, our specially designed Configurable Code of Conduct™ enables lower cost of ownership, further flexibility with your implementation plan, and more control of seat time. By leveraging our "off-the-shelf" topics, customizable based on your program's evolving annual business risks, we can 'configure' the topic areas to develop training to fit.

### Choose from any of the following courses:

#### Employment and Workplace Issues

- Conflicts of Interest: Hiring Family and Friends (Compliance Snapshot)
