- Course Summary
ISO 14001:2004 Environment Management System Certified Auditor Training

Duration: 6 hours
Price: $169.95

This course introduces the ISO 14001:2004 standard by discussing its advantages to any organization desiring to develop an EMS. It describes the detailed requirements for implementing the ISO 14001 standard, EMS documentation, aspect-impact assessment, and for developing environment objectives as well as environment management plans to implement the system. After explaining how the system is developed, this course describes how to audit the system, details a tool kit of more than 200 questions checklist to audit the system and report audit findings, and describes steps for implementing ISO 14001 certification.

Overall, this course helps an organization understand ISO 14001 requirements, document EMS, implement the system, evaluate through audit process, and finally certify the system with structured improvements to succeed in today's competitive marketplace.

**Learning Objectives:**

At the conclusion of this course, you will be able to:

- Discuss Environmental Management definitions, concepts, and guidelines
- Explain the Requirements of the ISO 14001:2004 standard
- Identify and relate Environmental Aspects
- Defend the Importance and Benefits of an Environmental Management System
- Illustrate how to design and develop a EMS
- Summarize how to deploy and continually improve the EMS in your company

**Course Outline:**

- Lesson 1: Introduction to Environment Management System
- Lesson 2: Requirements of ISO 14001 EMS
- Lesson 3: ISO 14001 EMS Documentation
- Lesson 4: Aspect-Impact Identification and Methodology for conducting IER
- Lesson 5: Steps to ISO 14001 EMS Installations
- Lesson 6: EMS Audit
